SUMMARY

Information Technology student with a strong interest in Web Development, AI Applications, and Automation. Currently building web applications and AI-powered projects while exploring modern software development practices. Passionate about creating practical solutions using web technologies, APIs, databases, and AI tools, with a continuous focus on learning and improving technical skills.

PROJECTS

Job Application Tracker – Full-Stack Web Application

- Built a full-stack web application to manage and track job applications.
- Implemented application status updates, interview tracking, and search functionality.
- Integrated backend APIs and PostgreSQL for storing and managing application data.

[Github](#)

AI Resume Analyzer

- Developed an AI-powered resume analyzer using the Gemini API.
- Enabled resume upload and automated analysis for skills, ATS score, and improvement suggestions.
- Designed a responsive user interface to present AI-generated insights and recommendations.
